CAREER OBJECTIVE

Designed an ECE undergraduate specializing in the intersection of hardware systems and full-stack software development. Actively builds end-to-end projects ranging from IoT-enabled microcontrollers (ESP32/Arduino) to secure, blockchain-integrated web platforms, with a core focus on AI and computer vision for practical, user-centered applications.

EDUCATION

V.S.B. Engineering College

2023 – 2027

B.E. in Electronics and Communication Engineering

- Current CGPA: 8.9

Tirupathi Arulneri Higher Secondary School

July 2023

Class XII

- Score: 83.5%

TECHNICAL SKILLS

- **Languages:** Java, C++
- **Web Development:** React, Node.js, Express, HTML, CSS, REST APIs
- **Databases:** MongoDB, MySQL
- **Hardware & IoT:** Embedded Systems, Microcontrollers, ESP32-CAM, Sensors
- **Tools & Concepts:** Blockchain, OpenCV, GitHub, UI/UX Design

EXPERIENCE

Brainery Spot

2023 – 2024

Web Development & Technical Writing Intern

- Contributed to feature development and authored structured technical documentation.
- Converted requirements into clear implementation plans, improving execution clarity.
- Documented APIs and workflows to enhance maintainability and onboarding efficiency.

PROJECTS

Blockchain Skill Credentialing App

React, Node.js, Express, MongoDB, Blockchain Logic

- Developed a full-stack platform for the secure issuance and verification of skill-based certificates.
- Implemented tamper-proof verification by assigning each credential a unique ID and cryptographic hash.
- Designed a modern, mobile-friendly UI for admins to manage credentials and users to view/share certificates.

Seed Quality Tester and Separator

ESP32-CAM, Python, OpenCV, Embedded Systems

- Developed an automated system to detect and separate defective seeds using image processing.
- Captured and analyzed seed images using an ESP32-CAM, classifying seeds via Python OpenCV.
- Implemented physical separation using a servo-based mechanism and vibration alignment.

EXTRACURRICULARS & LEADERSHIP

"Silicon Showdown" (KANAL 2K26)

February 2026

Event Coordinator, V.S.B. Engineering College

- Organized and coordinated a department-level non-technical event, managing planning and execution.

Participant – CICADA '25

October 2025

KPR Institute of Engineering and Technology (KPRIET), Coimbatore

- 24-hour national-level hackathon hosted by KPR Institute of Engineering and Technology (KPRIET), Coimbatore.

CERTIFICATIONS & ADDITIONAL INFO

- **Certifications:** Completed Java Fundamentals (Infosys Springboard); Certified in UI/UX Masterclass (Skill Dragon); Certified in Cloud Computing Engineering (Azure/AWS) – NASSCOM.
- **Continuous Learning:** Active on GitHub building AI and Blockchain integrated full-stack projects.
- **Languages:** Tamil (Native), English (Professional Proficiency), Telugu.
